Re: Recommendation for Kelvin Mutua – Tech Attachee from Pwani University

I am pleased to write this letter of recommendation for Kelvin Mutua, a third-year Bsc. Telecoms and IT student at the Pwani University, who successfully completed his industrial attachment at Swahilipot Hub Foundation, under the Technology and Engineering Department, from May 12 to July 31, 2025.

Kelvin participated in a structured attachment program that exposed him to three core tracks, where he demonstrated strong technical ability and professional growth:

- **Software Development Track**
 - Frontend: HTML, CSS, Tailwind CSS, JavaScript, React.js.
 - Backend: Python (Django) and API testing using Postman, Git
- **Data Analysis Track**
 - Data collection using online forms
 - Data cleaning and visualization with Excel
 - Data analysis using Python (Google Colab)
- **Project Management Track**
 - Agile methodology and project lifecycle
 - Task management using Trello
 - Report writing and documentation using Google Docs

Throughout the attachment, Kelvin demonstrated excellent soft skills such as punctuality, adaptability, self-drive, teamwork, discipline, and a strong openness to feedback. His ability to collaborate, learn fast, and contribute meaningfully made him a valuable part of any team.

I confidently recommend Kelvin for internship or junior-level roles in software engineering, data, or project teams. He has the technical foundation, mindset, and professionalism to thrive in any forward-thinking organization.

Sincerely,

Ayubu Mohamed
Tech Program Manager
Swahilipot Hub Foundation
